

## CFC-free Refrigerant Air-cooled Water Chiller

SIC-12A-R2

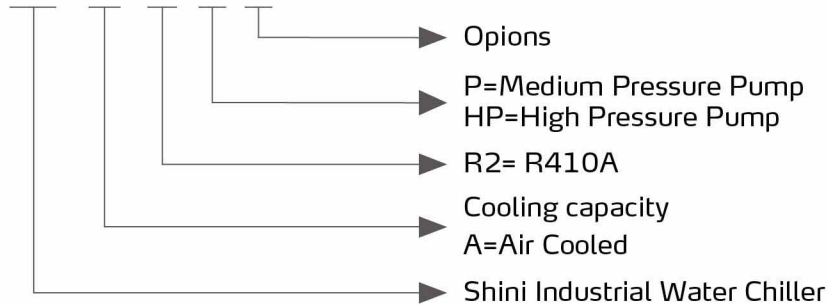

Refer carefully to the manual before operation.

# SIC-A-R2 Series

## ■ Coding Principle

SIC - xA - R2- xx- xx

## ■ Features

- Cooling range 7~25°C/44.6°F~77°F.
- Stainless steel insulated water tank.
- Equipped with anti-freeze thermostat.
- R410A ozone-friendly refrigerant.
- Refrigerant loop controlled by high and low pressure switches to ensure stable operation.
- Compressor and pump overload protection.
- Adopt high precision temperature controller with a max precision of +/- 1°C/1.8°F.
- All adopt quality compressors from major suppliers.
- Full-size air-cooled fin condenser for guaranty cooling capacity.
- Equipped with hot-gas bypass valve for precision temperature control without the need to frequent the ON/OFF cycle.
- Equipped with RS485 communication interface to realize centralized monitoring.

Control Panel

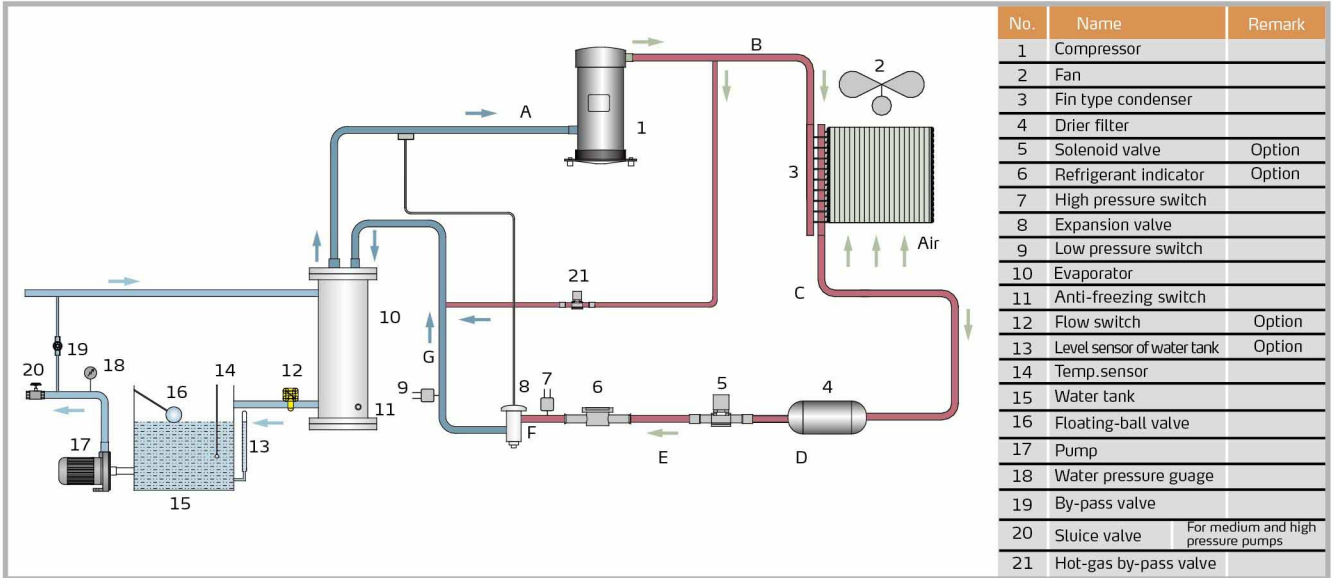

## ■ Options

- For models with a medium-pressure pump, add "P" at the end of the model code, and for models optional with a high-pressure pump, add "HP" at the end of the model code.
- The level indicator in water tank is optional to check whether the water level is within normal range, and add "SG" at the end of the model code.
- Liquid solenoid valve for pump down a refrigerant circuit to avoid liquid migration back to the compressor on the off-cycle. It can potentially prevent liquid slug on startup. Add "LS" at the end of the model code.
- Optional refrigerant indicator the refrigerant moisture content, and add "LSG" at the end of the model code.
- The flow switch is optional to ensure that the unit runs under sufficient water, and add "FW" at the end of the model code.

## ■ Application

SIC-A-R2 series are applicable for cooling moulds to reduce the product moulding cycle; they are also available in the cooling of equipment to maintain a normal temperature. Besides, they are suitable for other industries with the need for water cooling.

## Structure of Air-cooled Models

- ① Stainless steel circulating water tank.
- ② Large flow 3-phase pump ensures no blockage and high torque.
- ③ High/low pressure gauges to display system pressure.
- ④ Main power switch.
- ⑤ Pump pressure gauge to display water pressure.
- ⑥ Scroll-type compressor(s) for high efficiency and low noise.

- ⑦ Expansion valve .
- ⑧ Tube-fin condenser .
- ⑨ Shell-and-tube type evaporator.
- ⑩ Powder coating coated frame and control box.

| Unit Conversion                |                          | 1 kW = 860 kcal/hr   |                                  |                 | 1 RT = 3,024 kcal/hr             |               |              | 10,000 Btu/hr = 2,520 kcal/hr |             |             |             |             |           |

- Notes: 1) Cooling capacity is measured based on the flow of 0.172m<sup>3</sup>/(h.kW) and the outlet temperature 7°C/44.6°F of chilled water under the environmental temperature of 35°C/95°F.
- 2) Cooling capacity is measured based on the flow of 0.172m<sup>3</sup>/(h.kW) and the outlet temperature 15°C/59°F of chilled water under the environmental temperature of 25°C/77°F.
- 3) It is the working pressure of water pump when negative pressure of inlet water is 0.
- 4) Low pressure pump is standard, customers can change for medium pressure pumps (use P for short; e.g.: SIC-and A-R2-P) or high pressure pumps (use HP for short; e.g.: SIC-and A-R2-HP), specific parameters in turn as shown above.
- 5) Pump power is included in total power.
- 6) Special orders of machine voltage can be acceptable according to customers's request.
- 7) The air-cooled water chiller is applicable to the conditions under the environment temperature of 43°C.

# SIC-A-R2 Series

| Unit Conversion                | 1 kW = 860 kcal/hr    1 RT = 3,024 kcal/hr    10,000 Btu/hr = 2,520 kcal/hr |   |             |           |           |           |           |           |                     |           |       |

Notes: 1) Cooling capacity is measured based on the flow of 0.172m<sup>3</sup>/(h.kW) and the outlet temperature 7°C/44.6°F of chilled water under the environmental temperature of 35°C/95°F.

2) Cooling capacity is measured based on the flow of 0.172m<sup>3</sup>/(h.kW) and the outlet temperature 15°C/59°F of chilled water under the environmental temperature of 25°C/77°F.

3) It is the working pressure of water pump when negative pressure of inlet water is 0.

4) Low pressure pump is standard, customers can change for medium pressure pumps (use P for short; e.g.: SIC-and A-R2-P) or high pressure pumps (use HP for short; e.g.: SIC-and A-R2-HP), specific parameters in turn as shown above.

5) Pump power is included in total power.

6) Special orders of machine voltage can be acceptable according to customers's request.

7) The air-cooled water chiller is applicable to the conditions under the environment temperature of 43°C/109.5°F.
